Decision Making

Leadership

Adaptability

PROJECTS

Autolights

- An end-to-end IoT project to control switches remotely.
- An idea to replace traditional switch boards with smart switches.
- There is an android app involved to control switches. The app has features like User signup and login with password. A user can setup a user profile. Users can add owned switches with the help of credentials of switch like Product ID and product Key. By clicking the button they can control a switch and connected device as on and off.
- All the user data is stored in firebase real time database.

Dhumketu-Shamak : The Fire Fighting Bot

- An automatic Fire fighting robot which detects and extinguishes fire on its own.
- The motive behind this is to remove human involvement in case of accidents like farm fires.
- The device was Controlled using blynk app for IoT. This project was presented in "SRIJAN 2020" and Nation Conference on "Emerging trends and Innovation in Electronics Technology 2020". The project was well appreciated by Judges at both occasions.

Smart Irrigation

- An irrigation system that knows everything about soil in terms of its humidity and moisture.
- Helps those who don't have enough supply of water.
- Helps in water conservation.
- Waters only when needed and that too according to the temperature and weather.
