WORK EXPERIENCE

DATA ANALYST

Neo Industrial Systems | Oct 2021 – May 2022

Role:

- Create dashboards and data insight to implement techniques and machinery to convert the time-consuming procedure of manufacturing and supply into a procedure involving less manpower and efficient automation.
- Create and maintain KPIs from the various sources of data collected from the vast clientele.
- Also responsible to capture the past, present, and future analysis of data secured through product sales in order to help propel the business and maintain reports and queries that support my team which ultimately results in customer satisfaction.
- Experience in managing partnerships with engineering, product, and operations.
- Ability to build relationships with cross-functional partners across different geographies.

PROJECT DETAILS

SMART IRRIGATION

Helping farmers to conserve water by detecting the temperature and humidity of soil with the help of DHT sensor.

FIRE FIGHTING ROBOT

A vehicular fire extinguisher bot equipped with IR sensors on all sides of it to detect fire, a GPS tracker to control it manually or can be used automatically and a water tank to extinguish flames.

AUTO LIGHTS

A smart switch that remotely controls the status of the switch helping us to conserve energy, consisting a Node MCU, a relay and an android app developed using android studio.
